 Immersive Program

### EXPERIENCE

#### Revelio Labs

Senior Frontend Engineer

December 2022 - Current

- Led ownership of multiple projects, ensuring successful delivery within deadlines and overseeing other developers
- Implemented a secure and user-friendly account app, featuring robust signup and login functionalities
- Enhanced the dashboard app by introducing new pages, contributing to improved user experience and expanded functionality
- Integrated Zoho to create a streamlined email flow triggered by user signups, improving user engagement and communication

#### PointCard

Software Engineer

January 2022 - November 2022

- Created responsive frontend pages
- Worked on the mobile app using React Native
- Used Segment to create and track user events

#### Untapt

Frontend Engineer

September 2018 - December 2021

- Wrote clean and clear code in AngularJS (learned on the job) and ReactJS
- Created NPM packages that were used and customized in many different applications
- Switched over an AngularJS application to React
- Tech lead and project manager for a few clients
- Filled in for backend engineer when needed

#### Impakt Advisors - United States Marine Corps

Contract work (2019 - 2022)

- Created Angular app for the US Marines from the ground up
- Used ChartJS to create a dashboard of diagrams to display data
- Hosted app on Netlify

#### Tzivos Hashem

Contract work (2019 - Current)

- Used responsive CSS to make the app mobile friendly
- Used ChartJS to create animated charts for students to see their reports
- Created downloadable report cards with React
